Trademark Search Room

Effective Apr. 2, 1984, responsibility for the Trademark Search Room was transferred from Trademarks to Administration's Office of Patent and Trademark Services. This is the same Office currently responsible for the Patent Public Search Room.

The Trademark Search Room had been in Trademarks because it directly supported the Trademark examination process. With the implementation of an automated Trademark Search system this summer, examiners will no longer use the Trademark Search Room. It will be solely for the public.

Assistant Commissioner for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.
